

LOC precision kit BT-70 サイズ胴体キット PK-25 & PK-4
機体組み立て用部材一式込み

LOC社BT-70用キット :LOC IRIS

One of the ADVANCED SERIES of kits, which feature factory pre-slotted airframe and through-the-wall fin construction, the ISIS is our sport scale version of the famous IRIS rocket The 29mm motor mount is perfect for F and G motors and the rugged airframe can take I power if you can handle it. Parachute Recovery. All LOC/PRECISION "PK-XX" kits include heavy duty airframe and motor mount tubes, high-grade precision-cut plywood fins, centering rings, rip-stop nylon parachute or streamer, nylon elastic shock cord and mount, launch lug, polypropolene nose cones and instructions.

LOC社BT-70用キット :PK4 lil nuke

This kit uses a single 29mm composite motor, but can be flown with a ESTES D12-3 using a MMA-1 (not included). Each kit comes complete with nylon elastic shock cord, plastic nose cone, precision machined plywood fins and centering rings, and parachute recovery system. A special PRE-MARKED airframe for fin and launch lug attachment is included to make assembly quick and easy.

Product Features

The lil NUKE is an all around classic performer with sharp styling! Designed to last flight after flight. Because of its drag cheating characteristics, this model is capable of attaining altitudes to over 2200 ft. using a G motor. Streamer Recovery.

¥20,000前後

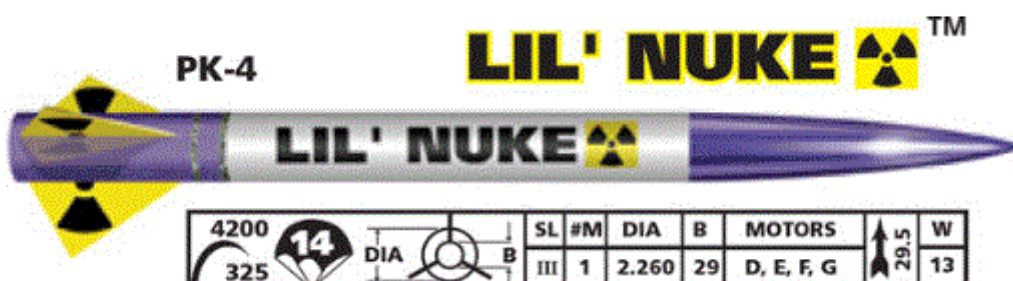

NOTE: 24mm size motors require MMA-1, 24mm adapter.

About Rocket Kits Components

¥15,000前後

NOTE: 24mm size motors require MMA-1, 24mm adapter.

One of the original NOVICE KIT SERIES which include pre-marked airframe and 29mm motor mounts, the LIL' NUKE is and all around classic performer with sharp styling. It can be flown on an Estes D12-3 motor with an optional MMA-1 Adapter but goes out of sight on Aerotech 29mm Composite Motors! Parachute Recovery.

All LOC/PRECSION "PK-XX" kits include heavy duty airframe and motor mount tubes, high-grade precision-cut plywood fins, centering rings, rip-stop nylon parachute or streamer, nylon elastic shock cord and mount, launch lug, polypropylene nose cones and instructions.

エステス製は比較的安価ですがBT-70仕様はありません(BT-80相当品)

Maxi Alpha 3

EST1903

Giant scale version of the popular rocket, the Alpha. Great for demonstrations with slow realistic lift-off and dramatic 24" parachute recovery. Flights up to 700 ft.

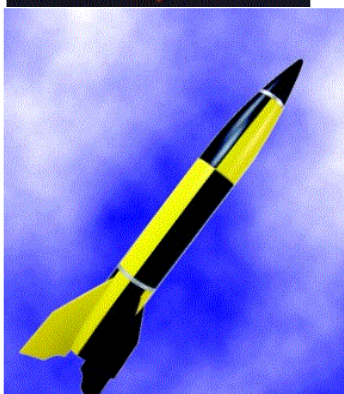

Specifications:

Length: 33.2" (84.3cm) **Diameter:** 2.6" (66.04mm) **Weight:** 6.6oz (187g)

Fins: Plastic

Recommended Engine: D12-3, E9-4, E9-6

¥6,000

V-2 Missile EST3228

This large semi-scale version of the World War II ground-to-ground ballistic missile is impressive in the air and on display and could travel as much as 200 miles at nearly 2000 MPH. The Estes version can reach heights up to 350 feet (107m)

Specifications:

Length: 22.4" (56.9cm) **Diameter:** 2.6" (66.04mm) **Weight:** 6.3oz. (178.6g)

Fins: Balsa **Recommended Engines:** C11-3, D12-3, E9-4*, E9-6*

Requires 3/16" maxi rod sold separately

* E engines require the Porta Pad "E" Launch pad (2238) and the "E" Launch Controller (2230) sold separately

¥5,200

Executioner E-SERIES

Skill Level 3

EST1951

Beautiful E-Powered rocket. Flights up to 600 ft. Features blow molded nose cone, laser cut wood fins, Adaptor for D engine included. Requires Est2238 launch pad and Est2230 launch controller sold separately!

Specifications: Φ 66mm

Length: 38.5" (97.8cm) **Max Altitude:** 590ft (427m) **Recovery:** 24" Parachute

Fins: laser cut wood **Engines:** D12-3, D12-5, E12-4, E12-6
