Welcome to PerfectFlite!

We've streamlined our site to make things easier to find, and added more information and a gallery of customer photos. The product pages now have links to [PerfectFlite Direct](#), our discount webstore, for fast and secure online ordering.

The new *Eirefly* has been added to our line of altimeters - this tiny altimeter is about the size of a postage stamp, yet maintains the high standards of accuracy and reliability that you've come to expect from PerfectFlite products. Its low cost and individual calibration make it ideal for school rocketry programs, where uncompromising accuracy and affordability are especially important.

If you need even more features, take a look at our complete line of altimeters - the *StratoLoggerCF*, *Butt*, and the *ABRA*, and you'll be sure to be impressed with their features and affordable pricing. The *StratoLoggerCF*, for instance, can control deployment and record flight data from just about any flight imaginable - up to 100,000' - yet it costs less than \$55.00. Give one a try today, and you'll join the ranks of our thousands of satisfied customers!

If you have any suggestions or would like to submit some of your own photos or videos, please contact us at "info@perfectflite.com". Thank you, and enjoy the site!

YOUR MODEL ROCKET SUCCESS IS OUR MISSION!

Model rockets are more than just toys or just an educational and rewarding hobby. Model rocketry is the first step to outer space. We truly believe that because Apogee Components has been in business and helping rocketeers achieve success for more than 25 years (since 1987). We've seen how rocketeers have gone to shape the future of space exploration.

Apogee Components is dedicated to helping you achieve your model rocketry goals and taking you as far as you want to explore. Whether it be your first rocket launch, a student science fair project, or a certification launch in order for you to those large high power rocket motors, we're here to help.

Apogee are the new leaders in the model rocket industry because we take the time to listen to you and to help you with your projects. We are more than just a one-stop shop for supplies like model rocket kits, rocket engines, and construction materials. You've arrived at the best location for how-to information on model rocketry. As you explore this website, you'll see how much effort we've put into giving you the rocketry information you seek. From our detailed product descriptions, over 400 different how-to YouTube videos, and our bi-weekly newsletter, you'll quickly become the rocketry expert that everyone looks up to.
